About us

Sree Santhosh Garments : Crafting Sustainable Fashion for a Greener Future.

Welcome to Sree Santhosh, a pioneering force in the world of knit apparels and textile manufacturing since 1986. With a rich heritage and commitment to excellence, we have been proudly supporting some of the world's leading brands with our impeccable products and services.

As a one-stop shop, we offer bespoke design development and manufacturing of women's, men's, and kids' lifestyle apparels. From conceptualization to production, our skilled team ensures unparalleled quality and craftsmanship, tailored to meet the unique requirements of each brand we collaborate with.

At Sree Santhosh, we are proud to be the **first LEED Platinum Certified Textile Green Factory in India**, embodying our unwavering commitment to sustainability. Our Eco-Friendly and Vertically Integrated garment Manufacturing Unit operates entirely on renewable energy, reducing our carbon footprint and preserving the environment for future generations.

With a sustainable view, we prioritize ethical practices, social responsibility, and environmental stewardship. Our commitment to sustainability is reflected in every aspect of our operations, from responsible sourcing of materials to minimizing waste and promoting fair labour practices.

When you choose Sree Santhosh, you not only receive exceptional products and services but also contribute to a greener and more sustainable future. Join us in our journey towards a better world as we create fashion that blends style and conscience.

Together, let's embrace sustainability and make a positive impact on the world through responsible fashion.

Director's Perspective

C. Chandramohan (Founder)

As pioneers of sustainability, we integrate eco-friendly practices at every step. Our vertically integrated manufacturing unit powered by renewable energy showcases our commitment to a greener future, where sustainability and fashion harmoniously coexist.

Vinoth Kumar (Managing Director)

Being vertically integrated gives us a unique advantage. From design development to production, we maintain full control over every aspect, ensuring seamless processes, efficient resource utilization, and the ability to deliver exceptional, sustainable products to our esteemed clients.

Rajiv Kumar (Executive Director)

At Sree Santhosh, our unwavering commitment to quality sets us apart. From meticulous craftsmanship to stringent quality control, we ensure that every product we create meets the highest standards, reflecting our dedication to excellence.

Spinning

Spinning Excellence,
Sustaining the Future.

Spinning

A leading textile division equipped with state-of-the-art machinery, including over 21,000 latest spindles. We take pride in our world-class production facilities, from the Blow room to winding, enabling us to deliver exceptional quality yarn. With a production capacity of 14 tons per day and a range from 16's to 44's Count, we cater to diverse customer needs. We prioritize sustainability, implementing eco-friendly practices throughout our operations to ensure a greener and more responsible textile industry.

Printing

Vibrant Printing, Sustainable
Solutions. Let's Create Responsibly

Printing

Our Printing division offers a versatile range of ztechniques using two manual table top, 8-color and 12-color automatic machines. With a production capacity of 18,000 pieces per day and 1,500 pieces per day for digital printing, we cater to various requirements. Embracing sustainability, we prioritize eco-friendly practices in our printing processes. Our extensive range includes pigment, non-PVC, CMYK, discharge, photo, PU, silicone HD, and more. From embossing and flocking to digital and HD prints, we offer a wide array of sustainable options. Our commitment to sustainability extends to materials such as leather applique, satin applique, and all types of vinyl and reflective prints. Together, let's create vibrant designs with minimal environmental impact.

Our Product Strength

Where Style Meets Responsibility

Sustainable product which we can offer :-

- 100% organic cotton
- Organic cotton with Tencel
- Fair Trade Cotton
- Fair trade Organic Cotton
- Recycle cotton with Recycle Polyester
- Organic cotton with recycle Cotton
- BCI Cotton
- Eco Vero

Fabrics

Jersey | Pique | Fleece | Jacquards | Ribs | Pointelle | Interlock | Waffle | Terry | Cross Knits | Platted Interlock | etc.,

In House Design

Our Garment Designing Division is where creativity meets sustainability. With a passionate team of designers, we bring forth innovative and eco-friendly fashion solutions. From concept development to material selection, we prioritize sustainable practices, incorporating organic and recycled materials into our designs. Our commitment to sustainability extends to every stage of production, ensuring responsible manufacturing processes and promoting ethical fashion. Discover our collection that combines style and sustainability, making a positive impact on the environment and the world we live in.

India's first LEED Platinum Green Factory

Garmenting

Measures

- Maximising natural light internally through large windows and skylights.
- Prismatic panels installed under skylights for optimum dispersion.
- Reducing power consumption wherever possible.
- Re-Cycling of waste water including sewage.
- Minimising carbon dioxide emissions.
- Utilising cement paver blocks for driveways.
- Introducing natural greenery across all sites.
- Facilitating rain harvesting systems.
- Installing LED lights in all production areas.
- Humidifying the working atmosphere instead of air-conditioning to provide comfortable working conditions with reduced power consumption.
- Providing fully insulated Galvalume roofing for heat reflection.
- 100% Renewable Energy by Solar and Wind Mills.
- Sewing Capacity of more than 55,000 Pieces per day

Eco-Friendly Packaging

We prioritize eco-friendly packaging solutions by using recycled materials and promoting biodegradable options. Our packaging is designed to minimize waste and reduce environmental impact throughout the supply chain.

Renewable Energy Sources

We actively invest in renewable energy sources, such as solar and wind power, to power our operations. By reducing reliance on fossil fuels, we contribute to a cleaner and more sustainable energy future.

Supply Chain Transparency

We prioritize transparency within our supply chain, working closely with our suppliers to ensure ethical practices, fair labour conditions, and responsible sourcing of materials. We value long-term partnerships built on trust and shared sustainability goals.

Community Engagement

We actively engage with local communities and contribute to their well-being. Through initiatives such as educational programs, skill development, and supporting social causes, we strive to make a positive impact beyond our business operations.

Continuous Improvement

We are committed to ongoing improvement in our sustainability practices. We regularly assess and monitor our environmental performance, set targets for reduction in energy and water consumption, and explore innovative solutions to further enhance our sustainability efforts.

At SSG, we are dedicated to sustainability across all aspects of our operations. From zero discharge and organic certifications to fair trade practices and low carbon initiatives, we strive to protect the planet and create a better future for all.

A Greener Promise

We, at SSG, are committed to a sustainable future and take pride in practicing green ethics. Our focus is on planting trees in and around Tirupur to contribute to a greener environment. In collaboration with Vanathukkul Tirupur, we have planted over 100 plants, promoting biodiversity and preserving our planet for future generations.

Environmental Responsibility

At SSG, we prioritize ethical sourcing, processing, and delivery of our products. From using organic cotton and raw materials to the finished product, we ensure every step is environmentally conscious. Our effective waste management and pollution control policies protect Mother Earth. With an advanced Effluent Treatment Plant (ETP) capable of treating 10,00,000 litres/day, we achieve zero wastage and zero pollution, complying with environmental regulations.

Ethical Environmentalists

We actively participate in initiatives to save our natural environment, such as planting trees and building nests for birds. By fostering a flourishing ecosystem, we contribute to the preservation of our planet and its future.

Commitment to 100% customer satisfaction

Continual improvement in Quality Management Systems with ISO 9001:2015

Consistent product quality

Customized products meeting customer requirements

Timely delivery as per agreed terms and conditions

Competitive and acceptable pricing

Exceeding expectations

Quality Control:

Our company prioritizes sustainability in quality control practices, focusing on environmental responsibility and minimizing ecological footprint. We implement sustainable processes and materials, ensuring exceptional products and a responsible approach for our customers.

Protecting the planet

Leading the way to sustainable fashion.

Zero Discharge

Our commitment to environmental responsibility is evident through our installation of salt and water recycling plants. With multi-effect evaporators and crystallizers, we recover and reuse salt and water. Our primary, secondary, and tertiary effluent treatment plants, equipped with reverse osmosis systems, recycle water, treating 1500kgs of salt and 10,00,000 litres of water daily.

100% Organic Products

We are proud to hold GOTS and USB certifications, ensuring the highest standards of organic farming, production, and distribution. This comprehensive certification guarantees traceability across our entire supply chain and protects farmers and agriculture workers from harmful pesticides.

Fair Trade & Fair Wear

To combat social injustices in the manufacturing industry, we promote transparency through independent audits of our supply chain. We actively support fair labour conditions and social welfare initiatives, striving for a fair and ethical clothing industry.

Low Carbon

Our factories and facilities are powered by green electricity generated from our own wind turbines, reducing our carbon footprint and reliance on fossil fuels

Water Treatment

We prioritize responsible water management by implementing dye effluent processing through closed-loop purification systems. Our treatment ponds, sand filtration, and reverse osmosis processes convert waste water into clean water, powered by solar energy.

Environmentally Friendly

All our products are OEKO-TEX 100 standard class 1 certified, ensuring the safety of textiles and dyestuff for both health and the environment

Eco Friendly Packaging & labelling

Leading the way to sustainable fashion.

SUSTAINABLE TRIMS

- 100% Organic Cotton Recycled Paper Stickers
- 100% Organic Cotton Recycled Paper Tags
- 100% Recycled Polyester Woven labels
- 100% Organic Cotton Tape Printed Labels
- 100% Recycled Polyester Elastics
- 100% Recycled Polybags
- Bio-Degradable Polybags
- We are using FSC Certified Tags & Packing and Carton Boxes
- We are using FSC Certified Recycled Tags & Boxes

SSG Credence and Culture

Our commitment to sustainability extends to our values and culture. We respect the rights of workers, strictly prohibit child labour, empower our employees both economically and mentally, and adhere to environmental, social, and governance criteria. Our sustainability certificate and carbon neutrality efforts exemplify our dedication to responsible practices

Sustained Commitment

Corporate Social Responsibility (CSR) drives our commitment to ethical behaviour, economic development, and improving the quality of life for our workforce, their families, and the local community. Our sustainability policy focuses on energy conservation, waste reduction, consumer and environmental safety, and knowledge-sharing with employees.

Green Power Generation

To become self-reliant in electricity production, SSG has installed Wind mills generating 12 MW and Solar generating 4 MW of capacity power, catering to a significant portion of our energy requirements. We strive to generate power in eco-friendly ways and contribute to a greener future

Afforestation

With deep concern for Mother Nature, we have undertaken the initiative of planting more than 1 lakh trees and continuously explore advanced scientific methods of afforestation, ensuring a thriving ecosystem for generations to come.
